

HOWTO : SETUP OUTLOOK

This HOWTO will help you to setup an email client like outlook with your TLD Email account.

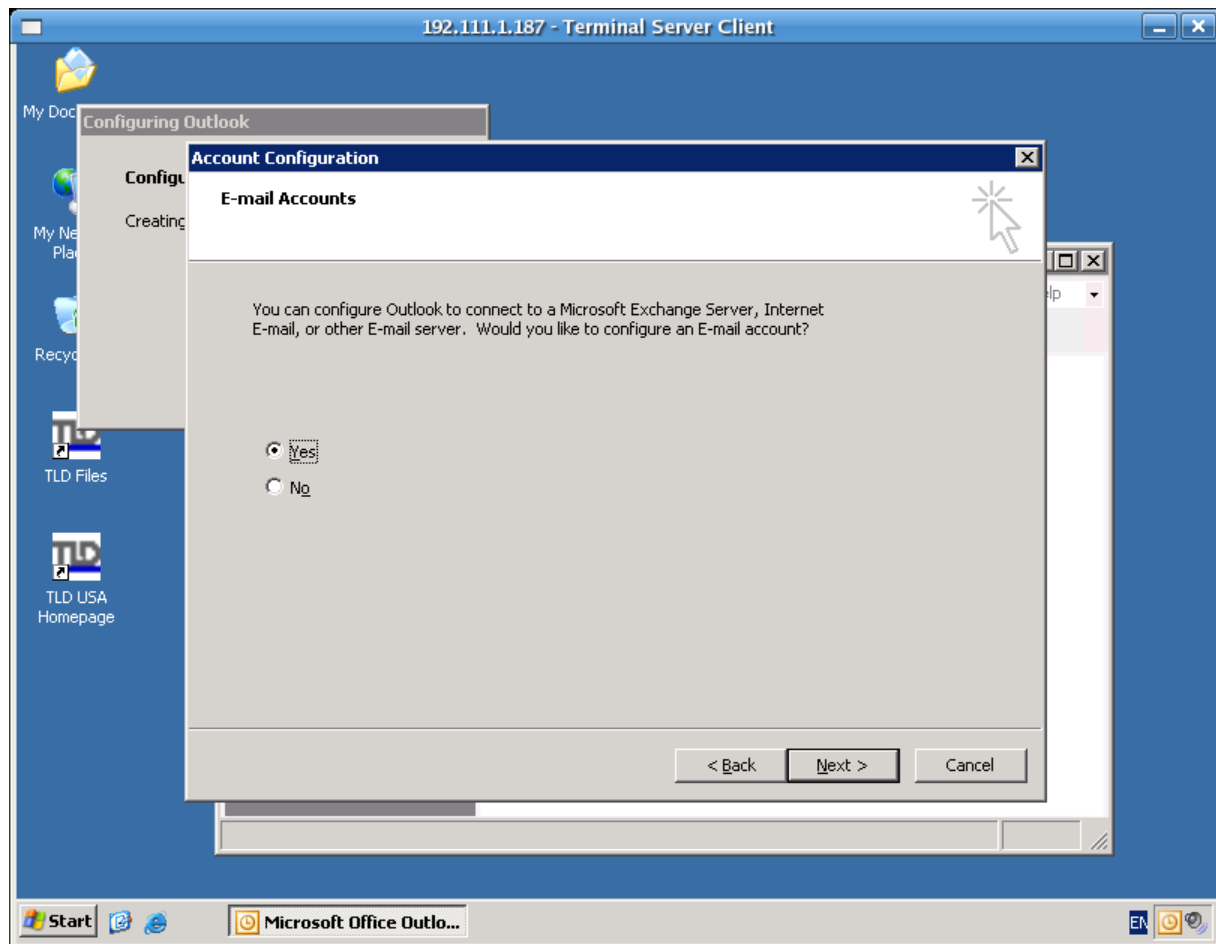

- run outlook.
- If it's the first time you run outlook then follow those instruction, else in outlook go in tools/email account/new account and follow the instructions of the page 4 of this document.

- At the outlook startup hit Next .

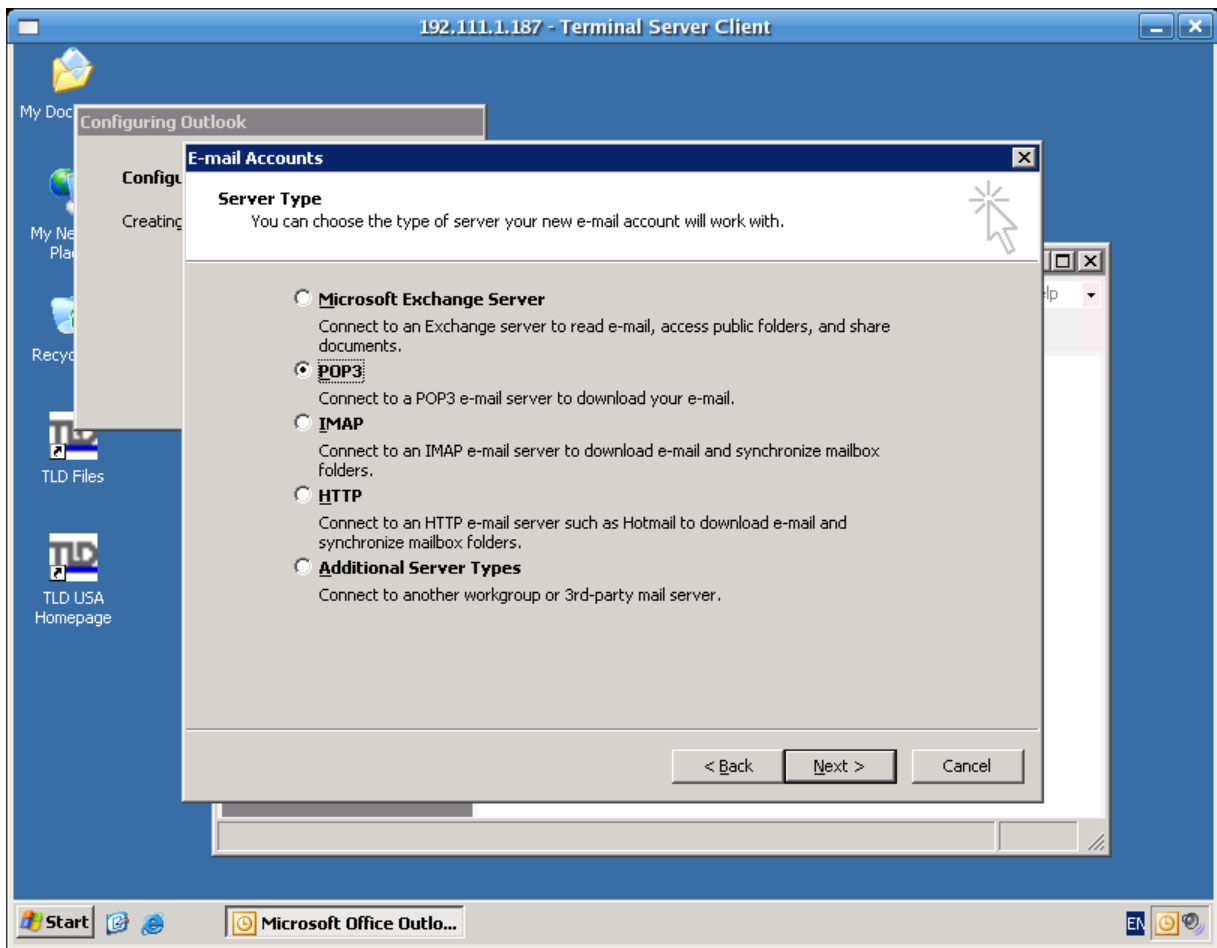

- Select yes and hit Next.

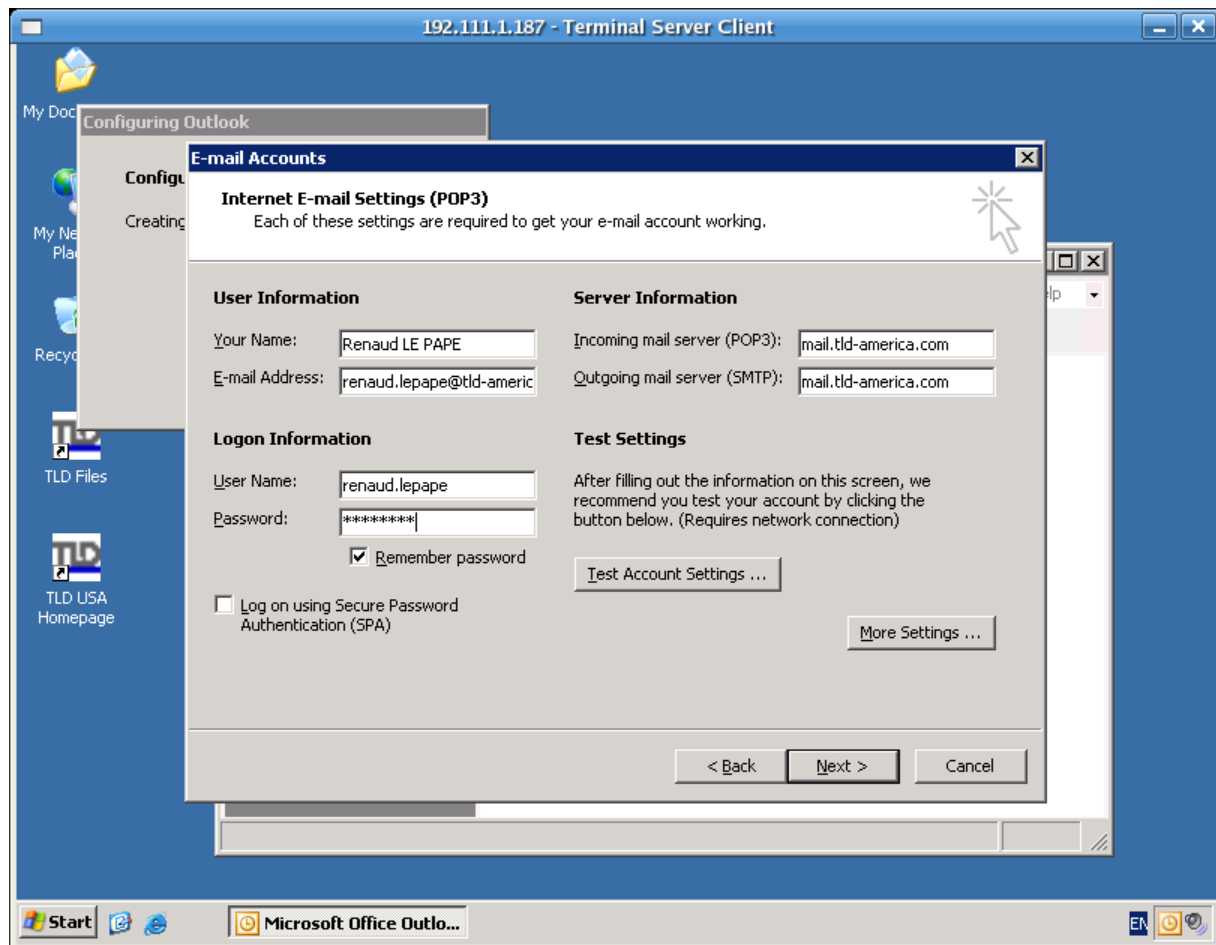

- Select **POP3** and hit Next.

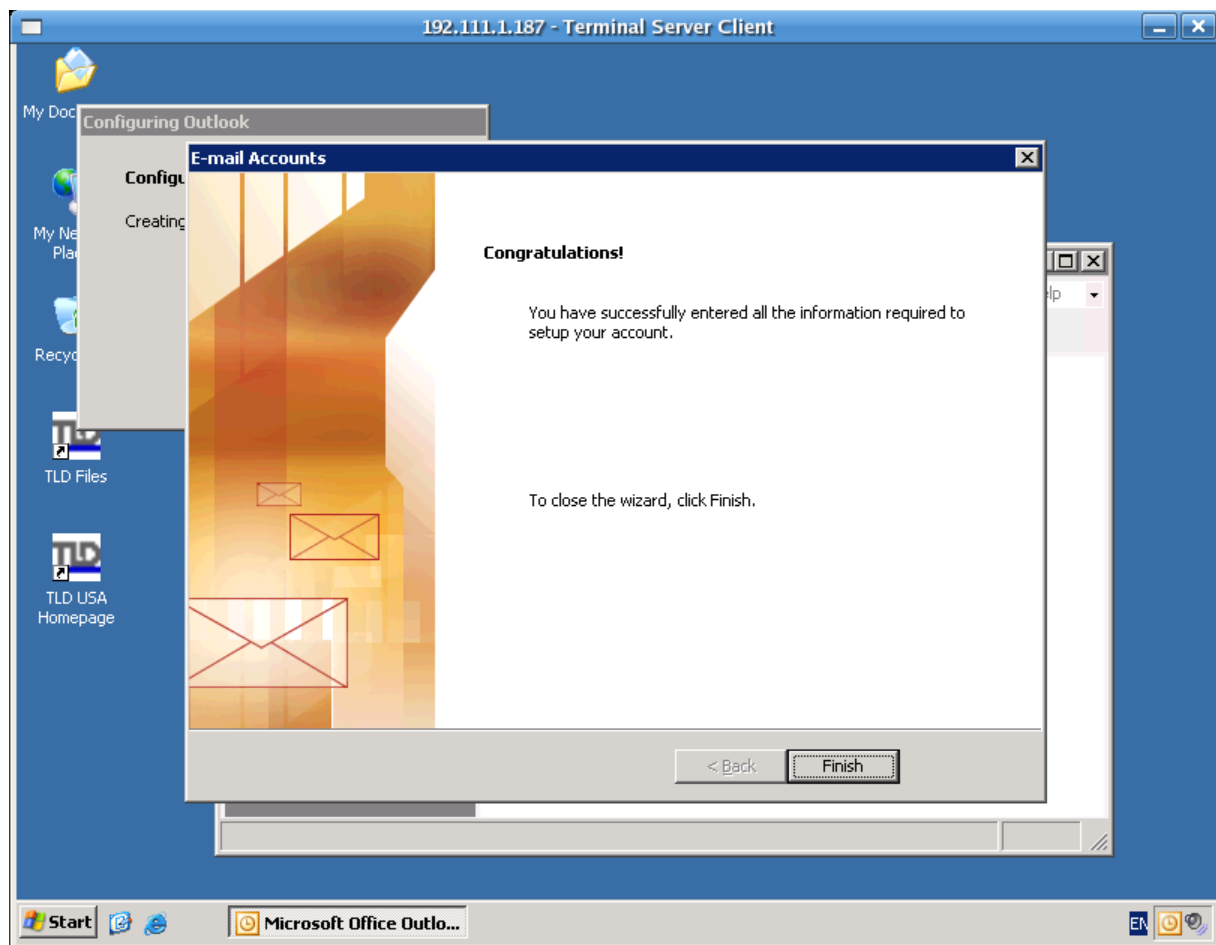

- Fill all the field with your informations:
 - name
 - email address
 - your password
 - incoming and outgoing mail server : **mail.tld-america.com**
- Hit Next

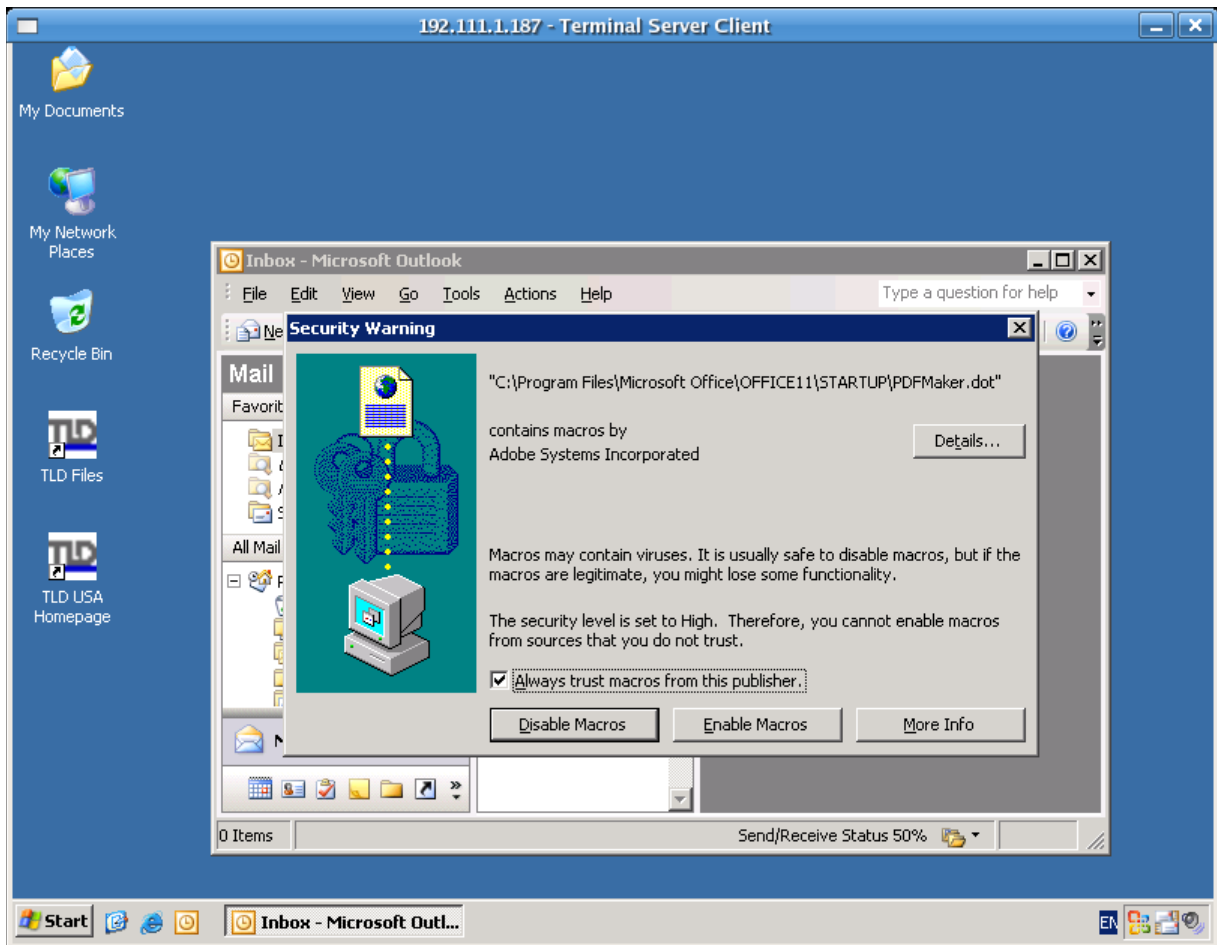

- Hit Finish.

- Check the check box and Hit Enable Macros.

- Your outlook is now all set !
