

SERVICE KPI DEFINITIONS

Assumptions:

- All day shall be considered as calendar days i.e. 365 days per annum
- TOC data are directly extracted from Intranet
- Consider full calendar day for calcul purposes
- The calculation period is one month starting 1st of the month

Calculation methods::

Name		Objectives	Unit	Calculation method
TIR	TOC Immediate Ratio	Measure every month each Service department reactivity in service	Pourcentage	SUM all TOC solved in less than 48 hours during the month DIVIDED by the NTS of the same month MULTIPLIED by 100
TAT	TOC Average Time	Measure Service department efficiency through the average time to SOLVE TOC	Days	For a particular month, SUM the time in days of all SOLVED TOC during that month DIVIDED by the NTS of that particular month
	Backlog Cumul	Measure the number of TOC left Open & In progress by month end	# TOC	DIFFERENCE between the number of TOC OPENED in a specified month and the number of TOC SOLVED for that specified month
TOL	TOC Oldest	Alerts about the oldest customer support issue not solved yet	Days	Get the list of TOC NOT SOLVED before the specified month AND take the bigger number of days opened until the end of this specified month

	GOOD	MARGINAL	NOT GOOD
TIR	>=60%	40% <= TIR < 60%	< 40%
TAT	<=7	7 < TAT <= 14	> 14
TOL	<=14	14 <= TOL < 21	> 21
