Evolution of the % of WC cost in the P & L of TLD GSE Conso

Evolution of average number of WC's per year of production

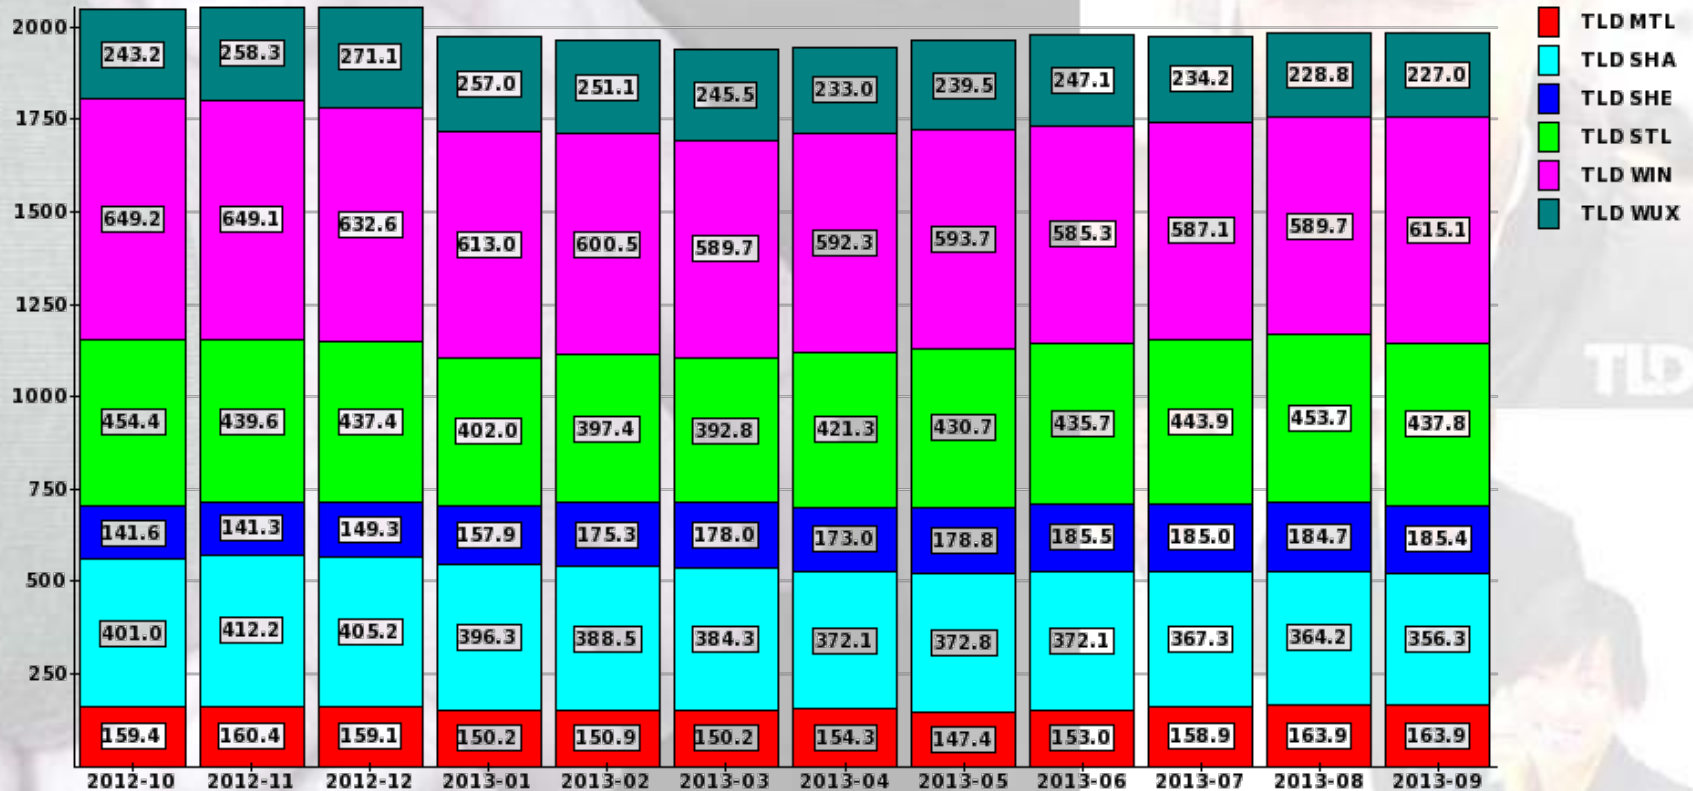

WC - Average number of WC per Machine, shipped < 2 years, for Previous 12 Months

Continuous slight improvement from 1,42 to 1,36 WC but recent increase since the low 1,285 in June

Best progress in SHE (-0,4 WC) and Warning light in SHA (+0,17 WC)

WC - Mean time between failures, shipped < 2 years, for Previous 12 Months

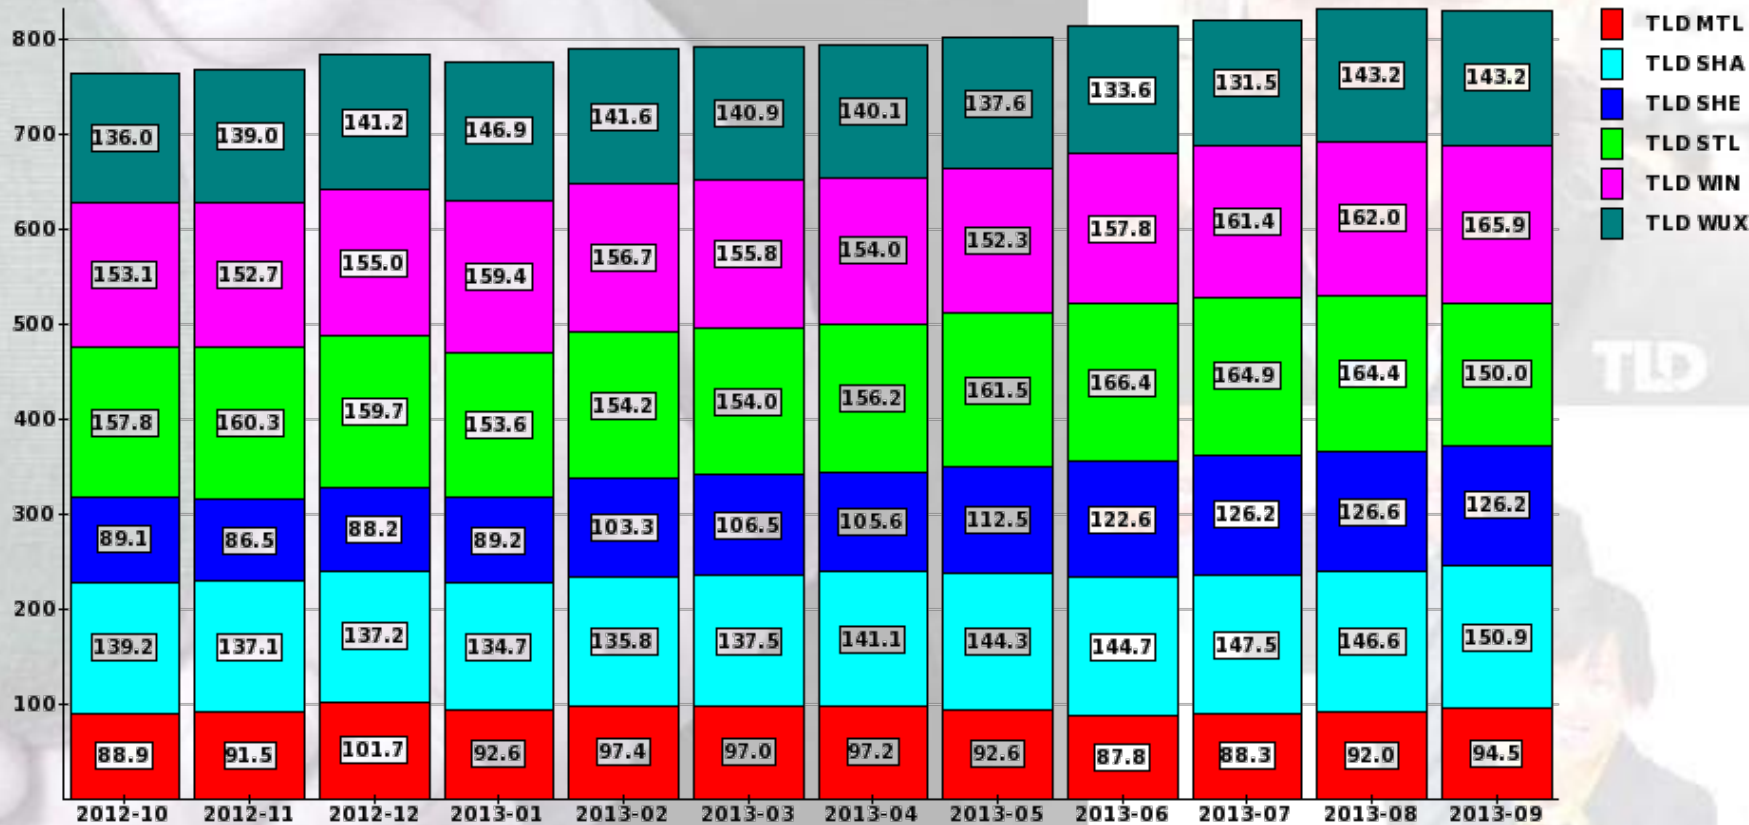

Bad trend from 341 to 330 days

Only to progress are and MTL (+5days) and SHE (+44 days)

Worst trend in SHA (-44 days)

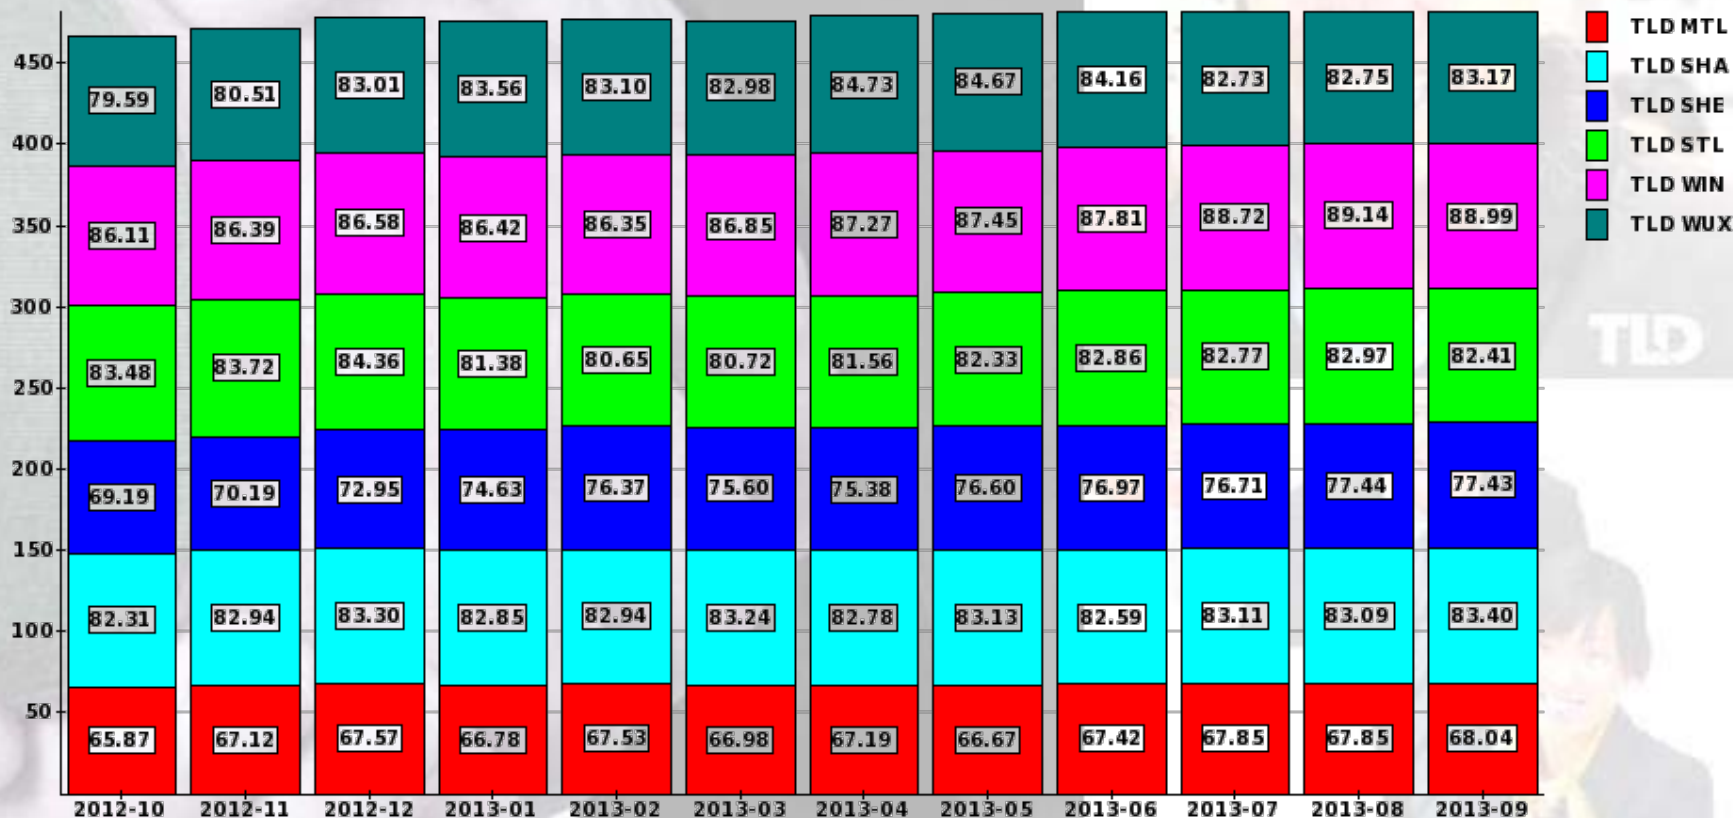

WC - Average Time at First Failures, shipped < 2 years, for Previous 12 Months

Continuous slight improvement from 127,3 to 138,5 days
 Best progress in SHE (+37 days!) and Warning light in STL

Average time at first failure
 Group target is 180 days

WC - % of Machines with NO WC in the first 3 months, shipped < 2 years, for Previous 12 Months

Continuous slight improvement from 77,8 to 80,6%
 Best progress in SHE (+8pts) and Warning light in STL

La sécurité est une préoccupation quotidienne

Vous êtes le premier acteur de la sécurité

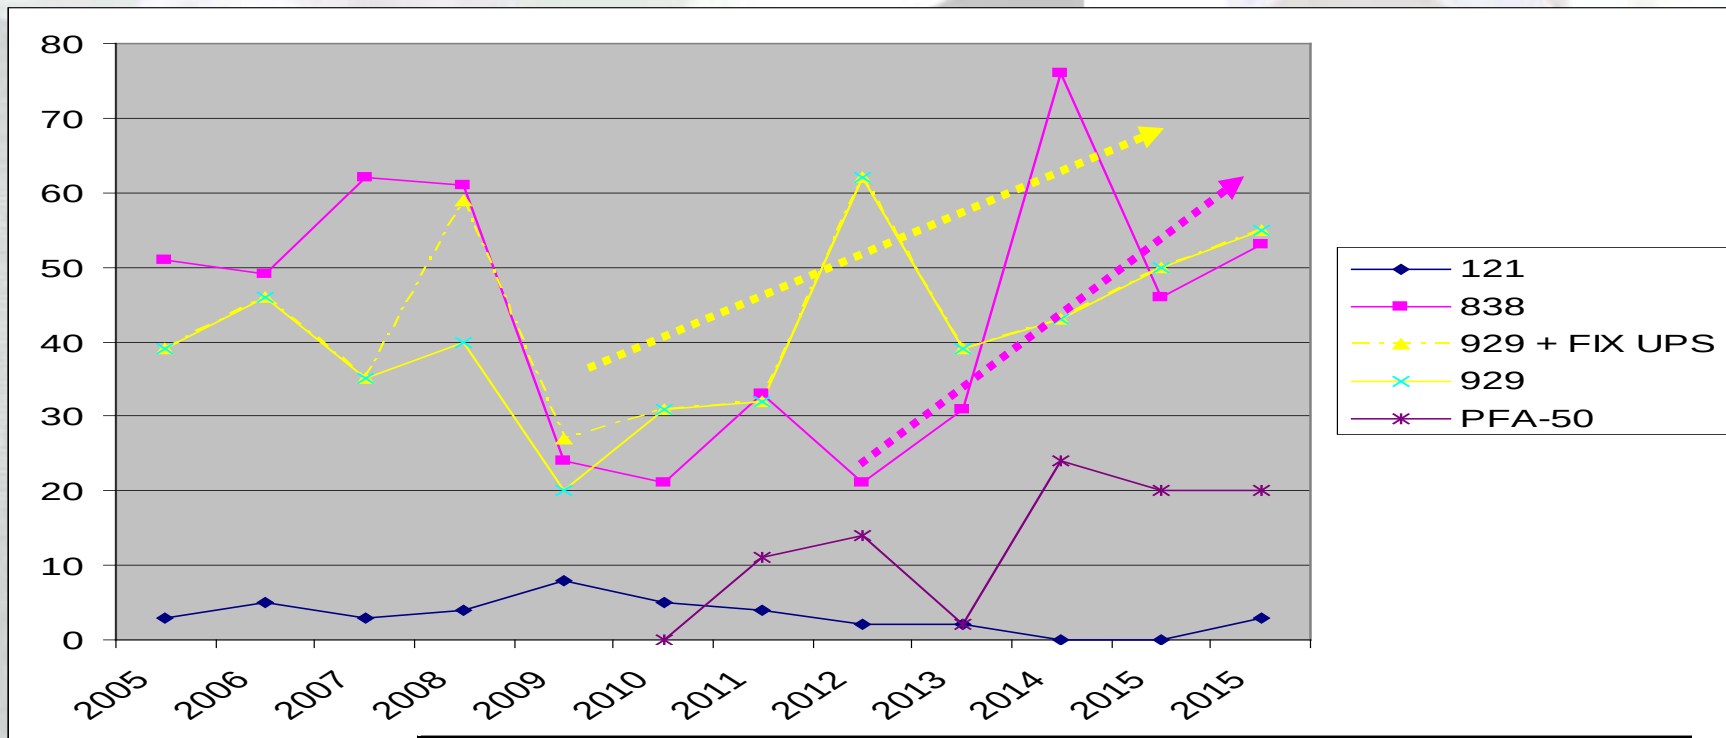

Vous serez le premier impacté par un accident

Les habitudes progressent:

très belles améliorations à l'atelier de peinture (port des protections, applications des procédures...)

Rappel : La consommation et la possession d'alcool et de drogue sont interdites sur le site.

Enfin, les absences courtes durées explosent (7 actuellement)
